DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9, 18-22, and 26-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Neiger et al., (US 2005/0071840), cited as prior art in 10/29/05.

As per claims 1-9 and 18-22, and 26-30, Neiger teaches a method for performing virtualization, comprising;

executing a plurality of input output instructions from an instruction stream during a single virtualization event and identifying an I/O instruction; and scanning the instruction stream to determine whether additional I/O instructions are present within an extent of instructions in the instruction stream. (Abstract, pgs. 1-5)
